volaris PEANUTbutter Protein

Wild Bird Feed

With many important nutrients

Especially in the cold winter months, birds need good fat food. With our peanut butter, specially developed for wild birds, you give your feathered friends nutrients that cannot be found in nature in winter. The jarred peanut butter with mealworms is a high-calorie as well as high-protein meal for many native birds.

The feeding jar can be placed safely in the peanut butter house, alternatively the butter can be offered directly on a flat surface.

Perfect for support during demanding weather and during breeding seasons.

Fôranvisning:

To be placed optimally in the peanut butter house for free disposal. Avoid direct sunlight. This keeps the mixture nice and firm. The butter is not suitable for human consumption.

The feeders should be cleaned regularly with hot water. If you offer food, please also think of watering water for the birds. Especially in winter, when natural water sources such as puddles or water in gutters are frozen, birds also need an extra bowl of water. However, there is no need for an expensive bird bath at the bird feeder; a flower pot saucer or an old soup plate is perfect as a watering place. The water should be changed regularly.

Sammensettning: 60,0 % Peanuts, mais, hvete, Dari (Hirse), Pflanzenfett, Mealworms dried

Innholdsanalyse: 15,9 % Raa protein, 22,8 % Raa fett, 14,1 % Raa fiber, 1,7 % Raa aske, 0,034 % Natrium
